About Us

Since 1967, Malcolm Thompson Pumps has been one of Australia's leading pump companies. We pride ourselves on providing a complete range of pump solutions to a diverse range of clients across Australia.

Our dedicated team spans across Australia, meaning we can deliver our customers a quality range of pumps and service and repair facilities while also offering complete pump package solutions through our specialist projects and engineering service.

We have completed a diverse range of projects, big and small, across a variety of industries including mining, industrial, agriculture, construction and mobile dust suppression.

This has given us the confidence and expertise to provide our customers with the products and service they require to keep their pumps in optimum condition.

Our state of the art workshops allows us to be at the forefront of the pump industry, delivering high quality, timely and consistent results to all our customers. We are proud to have such strong relationships with our pump partners, including Stalker Pumps, an Australian owned company with an onsite foundry.

You can trust Malcolm Thompson Pumps as your single point of contact for all your pumping needs.

Our People

Our team is comprised of experienced and dedicated professionals from many different fields of the pumping industry, including machining, production, service, sales and administration.

We are a dynamic and diverse team, and take pride in ensuring our clients pumping requirements are met.

With over 50 years' experience, the team at Malcolm Thompson Pumps are ready to deliver quality pumping solutions for your business.

Extensive Pump Range

We are proud to offer a diverse range of quality pumps from leading brands such as Aquaplus, Stalker Pumps, ProMinent, Grundfos, Wernert-Pumpen, Flux and many more listed below. Due to the size and reputation of our business, we are also able to source all major pump brands both locally and internationally.

Customised Pump Packages

At Malcolm Thompson Pumps we specialise in the provision of complete pump system solutions built to customer specifications. Working with both consultants and end users, we provide a full service project offering including design using the latest AutoCAD software, fabrication, assembly and performance testing. With over 50 years' experience, our dedicated engineering team can offer flexible solutions to meet your requirements.

Our Partners

In addition to the range below, Malcolm Thompson Pumps can also source further pump brands upon request.

Service and Repair

Our team are always on hand to offer our complete pump service and repair expertise. Our service vehicle fleet and pump service centres are designed and equipped to ensure the fastest turnaround times possible, with our technicians always identifying ways to maximise your pump's performance and minimise downtime. Areas we focus on include excessive wear ring clearances, internal recirculation, accelerated bearing wear and packing/mechanical seal failure.

We understand that hard working pumps require regular servicing in order to maintain efficient operation, however, whenever a pump or motor are moved, for purposes such as repair or maintenance, the pump motor shaft will require re-alignment. The best method for this is laser alignment. At Malcolm Thompson Pumps, our laser alignment practices utilise the latest in laser optical technology to precisely align the pump to the motor within a fraction of a millimetre, ensuring optimum pump efficiency between scheduled maintenance.

Preventative Maintenance

We attend multiple emergency pump failures each week and more often than not they could have been prevented or minimised with a structured preventative maintenance plan. We work with our customers to tailor maintenance packages for specific site requirements limiting the risk of an unexpected and costly emergency.

Manufacturing

We have fully equipped, modern workshops in Sydney, and Perth. Our state of the art facilities contain advanced machinery applications including assembly, CNC machinery, pump assessment and rebuilds, spray painting and pump and pressure testing facilities.

We are proud to own Stalker Pumps, a Perth based pump business, who are one of the last remaining pump suppliers in Australia with a foundry on site, giving us complete control of the end to end manufacturing process. Their foundry provides complete flexibility, including manufacturing high quality castings from customer supplied patterns. They can also cast in more than 19 types of ferrous and non-ferrous metals.

About Stalker Pumps

For over 90 years Stalker Pumps has been at the forefront of the Australian pump industry. Now a division of Malcolm Thompson Pumps, Stalker Pumps has even more credibility as a leading pump brand.

Engineered and manufactured in Australia to the highest quality standards, Stalker Pumps are legendary for their ability to operate at their fullest capacity, even in the most challenging of environments.

Stalker Pumps have a proven track record across almost every major industry including mining, agriculture, oil & gas, civil and manufacturing.

Agriculture

Water supply plays an essential role in a farms operation which is why we supply a wide range of pumps that suit all types of properties. From transfer and trash pumps to borehole pump packages, we have the expertise and experience to assist you.

Chemistry and Pharmaceutical

With pump failure a high concern when abrasive and toxic substances are being used, you can trust Malcolm Thompson Pumps to supply durable, safe and high quality pumps and pump packages.

Construction

Construction sites are often unpredictable due to weather and site layouts. Malcolm Thompson Pumps has the right solution to keeping your construction site dry and safe to work in.

Facilities Management

To ensure your buildings mechanical systems are in their optimum form, Malcolm Thompson Pumps partners with some of the most well-known and trusted brands. We provide a wide selection of pumps for boilers, air conditioning systems, heating systems and more.

Food and Beverage

Our focus in the food and beverage manufacturing sector is ensuring smooth, gentle, food transfer while taking into account rigorous hygiene requirements. We've developed a strong reputation by ensuring that our pumps constantly meet and exceed performance expectations.

Industrial

When in need of a pumping solution that will uphold tough, rigid conditions commonly found in industrial applications, Malcolm Thompson Pumps has the capability to supply, service or customise pumps to suit your needs and budget.

Manufacturing

The harsh and demanding conditions of the manufacturing process requires the dependability and durability of pumps you can rely on. Malcolm Thompson Pumps extensive range ensures you find the right pump for the job.

Mining

With over 50 years' experience in underground and open pit mines, Malcolm Thompson Pumps is positioned to deliver pumps and pump solutions for the most rugged and varied mining conditions. We are proud to have ongoing relationships with all major mining companies, mine sites and consultants in Australia.

Mobile Dust Suppression

A vital, yet often overlooked, component of mining and civil works is the use of water cart trucks to provide mobile dust suppression across mining, building and road construction sites. Our experienced team are here to improve operational water cart availability, productivity and costs.

Municipal Waste

Malcolm Thompson Pumps has a pump solution for all of your municipal waste processes from waste handling and separation, storage and processing, transfer and transport, and processing and treatment.
